COVID-19 RETURN-TO-WORK PROCEDURES

VERSIONS:
   April 28, 2020

In an effort to assists and clarify the return to work process post COVID infection or quarantine, GMR Medicine and GMR Clinical Informatics have developed an online return-to-work tool.

Accessing Return-to-Work Tool

You can access the online tool at the Global Medical Response website, or at this QR code:

To complete the return-to-work tool, you will be asked a series of Yes/No questions. Your answers to the questions will determine your eligibility to return to work. If you have nasopharyngeal swab test results, you will be required to upload them to this tool.

Your return-to-work authorization or instructions will be available for your review upon submission of the tool. Please follow the instructions given and forward them to your immediate supervisor.

As always, if you have any questions or concerns, you can contact your clinical leadership or the Emerging Infectious Disease Hotline at 855.361.1996.

Please remember to use appropriate and effective PPE and wash your hands!

Sincerely,

The GMR Medicine and Clinical Informatics Teams
